

James Coyne, Senior Vice President of Concentric Energy Advisors, will be speaking at the Natural Gas Technology Futures Workshop, February 9-10, 2010 at the Delta Hotel and Suites in Ottawa, Ontario. Mr. Coyne will address Utilities Regulation in a Low Carbon World on Tuesday, February 9 at 10:20 am.

The Natural Gas Technology Futures Workshop will “explore technology pathways and collaborative mechanisms that will optimize the contribution of natural gas - and of the natural gas distribution industry - towards attaining a low-carbon future in Canada. It will help develop a technology foundation for the long term vision for the natural gas distribution industry: to be recognized as the leader in delivering smart, low carbon energy solutions to consumers in support of sustainable communities.”

Following the Workshop, Mr. Coyne and colleague, John Slocum, will facilitate the two-day Regulatory/Industry Dialogue on “Changing Energy Services Delivery Model” held on February 24-25, 2010 at the Delta Chelsea Hotel in Toronto, Ontario. The Dialogue event will focus on the “pressures and potential changes to the economic regulation of energy services delivery in Canada as we push to a lower carbon world.”

If our utility regulatory experts can be of any assistance to you before or during the Workshops, or if you wish to learn more about our work on this timely topic, please do not hesitate to contact us.
